

Ems 1010 nayax onyx

PRINSIPPSKISSE WC MODELL EMS-1010 onyx

The EMS-8x has a 3-digit LED-Display, that shows the customer the current state of the device. A survey you can find in the following figure.

	Display shows minimum insertion: The connected device is free. Coins can be inserted.
	Display shows balance and is flashing: Coins have been inserted but the minimum insertion has not been reached yet. Further coins must be inserted.
	Display shows "Opn" (Open): The minimum insertion has been reached and the door is opened.
	Display shows "Occ" (Occupied): As long as the door is locked the display shows "Occ" = Occupied (only available if a door contact is used).
